Certificates

Koskisen plywood products are manufactured in Finland according to the strictest sustainability principles. Koskisen is a pioneer in environmental protection. In Finnish forestry, the wood supply chain is always known in detail. Finnish forests are primarily privately owned, and the owners are guided by a strong commitment to long-term forestry and forest management. Every year, more Finnish forests grow back than are harvested. This guarantees a sustainable and environmentally friendly raw material.

Koskisen Finnish birch plywood panels (PEFC Certificate No. INS-PEFC-COC-212560/
FSC Certificate INS-COC-100101/INS-CW-100101 Issue No. 4)
Available on request.

Cleaning & Care

A soft, slightly damp cloth is sufficient for cleaning. A mild soap solution can be used for heavier soiling.

Please do not use abrasive cleaning agents or aggressive chemicals to avoid damaging the surface. The open, finely sanded edges should be kept dry and protected from excessive moisture.

Dimensions may vary due to material and production tolerances
Subject to technical changes, errors and colour variations.

Consultancy

FLÖTOTTO is a key development partner for school authorities, architects, ministries and is in daily close contact with the teachers responsible in the respective schools. Together, we create flexible, age-appropriate educational spaces for intensive interaction between learners and teachers. The living and learning spaces we develop improve learning outcomes and, together with the architecture, ideally also have a positive impact on the immediate vicinity of the school location.

We remain your first point of contact until the project is completed and even years afterwards.

Get in touch with us, we will be happy to advise you!
